SUMMARY

Computer Science undergraduate at UiTM Shah Alam (CGPA 3.64) with hands-on cybersecurity experience from an internship at MyCERT Malaysia. Worked on EDR threat hunting and SOC tool development, and enjoy building web applications with Django, FastAPI, and Python. Seeking a role in cybersecurity where I can combine practical security operations with strong web development skills.

WORK EXPERIENCE

Python Automation Intern September 2026 - December 2026
Malaysia Computer Emergency Response Team (MyCERT)

- Performed threat hunting on EDR telemetry, analyzing process parent and child relationships and host activity to identify suspicious behavior.
- Developed internal SOC investigation tools in Python with Django and Django REST Framework, built as a CLI and web app.
- Built an MCP (Model Context Protocol) server to orchestrate SOC tools for automated investigation workflows through AI Agent.
- Analyzed network traffic captures with Wireshark and converted raw pcaps into readable audit transcripts.
- Studied and refined Elastic SIEM detection rules in EQL for EDR-based alerting.

IT Helpdesk Support Intern March 2024 - August 2024
Kridentia Tech Sdn. Bhd.

- Provided Level 1 technical support to client stores by assisting in restoring and troubleshooting internet connectivity issues.
- Logged, tracked, and followed up on support tickets to ensure timely issue resolution.
- Gained practical exposure to IT networking, troubleshooting, and customer communication in a professional environment.

EDUCATION

Bachelor of Computer Science (Hons.) - CGPA 3.64 Oct 2024 – Present
Universiti Teknologi MARA (UiTM), Shah Alam

- Currently pursuing a degree in Computer Science with a focus on software development and problem-solving using modern technologies.

Diploma in Computer Science - CGPA 3.67 March 2022 – August 2024
Universiti Teknologi MARA (UiTM), Tapah Campus

- Gained strong foundational knowledge in programming, algorithms, and database management.
- Completed various coursework projects involving Java and web-based systems.

SKILLS

SECURITY
EDR telemetry, threat hunting, Wireshark & pcap analysis, Elastic SIEM (EQL detection rules), Linux, Git/GitHub.
PROGRAMMING
Python (Django, DRF, FastAPI, TensorFlow), Java, C++, JavaScript
WEB & DATABASE
HTML, CSS, MySQL
TOOLS
Visual Studio Code, Microsoft Office

ACHIEVEMENTS

- **Dean Award - BACHELOR OF COMPUTER SCIENCE (HONS)** - UiTM Shah Alam, 2026
- **Anugerah Naib Canselor (Vice Chancellor's Award)** – UiTM Tapah, 2024
- **1st Place – Pertandingan Video Pendek Peringkat UiTM Se-Malaysia "Colourful Campus Life"** – UiTM Shah Alam, 2024

PROJECTS

Fine-Grained Dual-Attributes Classification for Lost Item Retrieval - Degree Final Year Project

- Developed a machine image recognition model utilizing MobileNetV2 to accurately classify and identify lost and found items.
- Implemented dual-attribute classification for both item type and color to improve retrieval accuracy.
- Evaluated model performance, improved classification accuracy, and prepared detailed documentation for the final report.

Tomato Leaf Disease Detection - Degree Project | Role: ML Model & Backend API

- Developed CNN model (TensorFlow) for disease classification from leaf images, handled data preprocessing, training, and performance evaluation.
- Built FastAPI backend exposing image upload and prediction endpoints.
- Integrated the model into the API for end-to-end inference from image to diagnosis.

SESTA School Registration System - Degree Project | Role: Web Designer

- Created a school registration system to manage student data and enrollment.
- Designed the website layout and user interface for easy navigation and clean design.
- Helped prepare project reports and documentation.

SULAM International Webinar Event – Degree Project | Role: Treasurer

- Managed the financial planning and budget of the event.
- Handled the payment collection process for the event's T-shirts.
- Recorded all financial transactions to ensure the project stayed within budget and helped prepare the final reports.

CERTIFICATIONS

Huawei Intelligent World 2030 – Certificate of Participation (2024)

- Gained insights into the future of intelligent connectivity, cloud technologies, and digital transformation.

Cisco Networking Basics Certificate (2024)

- Developed understanding of networking principles, protocols, and connectivity troubleshooting through practical coursework.
